Professional Summary

Final-year ECE undergraduate with a software-focused profile across full-stack development, backend systems, AI-enabled applications, and data analytics. Strong foundation in DSA, DBMS, and REST API development, with hands-on experience building database-driven applications and business-oriented dashboards.

Technical Skills

- **Programming Languages:** C++, Python, JavaScript, SQL
- **CS Fundamentals:** Data Structures and Algorithms, OOP, DBMS, Operating Systems
- **Web Development:** React.js, Node.js, Express.js, REST APIs, JWT, Tailwind CSS
- **Databases & Analytics:** MongoDB, MySQL, Pandas, Power BI
- **Tools & Integrations:** Git, GitHub, Postman, Gemini AI, Cloudinary

Experience

Frontend Developer Intern – Ricoz Solutions Pvt. Ltd. June 2025 – July 2025

- Developed and enhanced the **Blog** section of the company’s website using **React.js**, **Tailwind CSS**, and **shadcn/ui**.
- Built responsive and reusable UI components to ensure a consistent user experience across devices.
- Integrated frontend components with REST APIs to render dynamic blog content and resolved UI-related issues.

Projects

FinSentry – AI-Powered Personal Finance Intelligence Platform 🔗 📄

React, Node.js, Express.js, MongoDB, Gemini AI, Cloudinary, JWT, Zod, Node Cron, Resend

- Built and deployed an AI-powered personal finance platform with JWT authentication, transaction management, CSV import, receipt scanning, recurring transactions, and interactive analytics dashboards.
- Integrated Gemini AI and Cloudinary to extract merchant, date, line items, and category-wise expenses from receipt images for user review before saving.
- Implemented Zod validation, protected REST APIs, scheduled AI-generated monthly financial reports with Node Cron, email delivery using Resend, and rate limiting for secure backend workflows.

PrepPilot – AI-Powered Interview Preparation Platform 🔗

React, Node.js, Express.js, MongoDB, Google Gemini, JWT, Zod, Puppeteer

- Developed an AI-powered interview preparation platform that matches resumes with job descriptions to identify skill gaps and deliver personalized interview preparation.
- Leveraged Google Gemini to generate interview questions, ATS resume feedback, and tailored resumes, with JWT authentication, PDF parsing, and automated PDF generation using Puppeteer.

VendorIQ – Retail Vendor Performance & Profitability Intelligence 🔗

Python, SQL, SQLite, Pandas, Power BI

- Built an end-to-end analytics project to evaluate vendor performance, profitability, inventory efficiency, purchasing patterns, and low-margin brands.
- Created SQL summary tables and a Power BI dashboard with recommendations for pricing, bulk purchasing, inventory turnover, and vendor dependency.

Achievements

- Solved **450+ DSA problems** across **LeetCode** and **GeeksforGeeks**.
- Selected as a **Finalist (Top 8 Teams)** at **Technovate 3.0**, leading backend development for an AI-powered campus issue management platform.
- Led a team in the **ZS Campus Beats GenAI Challenge**, designing a GenAI-based workflow automation solution for a real-world business use case.

Education

UIET, Panjab University Aug 2023 – Jul 2027

B.E. in Electronics and Communication Engineering **CGPA: 7.85**

Bihar Public School, CBSE 2020 – 2022

Higher Secondary **92.8%**
